

4th Quarter 2025

TEXAS TURFGRASS ASSOCIATION

Thank You to all who attended the 2025 Winter Conference and Trade Show in Denton! Thanks to our attendees, sponsors, and speakers, the TTA had a very successful 2025 conference!

More Photos on pages 10 - 12

Keeping Texas Green SINCE 1947

President's Message

Howdy, I hope everyone enjoyed a successful 2025 and is making the most of winter here in Texas. Thank you to all who registered for our Winter Show in Denton, TX. It's always exciting to visit new regions and connect with Members and Exhibitors as we continue to promote the Turf Industry. Your support makes these events possible.

Our Association keeps evolving, striving to provide fresh and relevant education for all members. If you notice anything we're missing, please let us know so we can work to improve or address it. Alongside our educational offerings, we're also focused on having fun—as seen this year with live band events at both our summer and winter special events and receptions. If you attended in Denton, I hope you experienced how our 2nd Annual Reverse Raffle not only added excitement but also reinforced our commitment to education. Half of its proceeds support educational initiatives and the TTREEE Endowment for future scholarships.

Looking ahead, our focus shifts to the Summer Conference at The Woodlands Resort, happening July 12th–14th, 2026—mark your calendars! Our mission remains to keep the turf industry in Texas active and engaged.

Remember to support our vendors and sponsors when you need repairs, equipment, or sod. A big thank you goes out to all our sponsors; without you, the industry couldn't thrive. Special appreciation to our Annual TTA Sponsors and the Board of Directors for their continued dedication. Wishing you a wonderful winter and a Happy New Year!

Randall Anderson
2025 TTA President

Howdy Members!

This past year, 2025, focused on expanding our conference's impact in Education and Networking through both the Summer Show and Winter Conference.

What I truly appreciate is how our Board of Directors comes together with enthusiasm to discuss ways to help our industry evolve, adapt, and innovate. We may not always succeed perfectly, but we consistently make progress for the benefit of our members and the advancement of our industry and educational goals.

A huge congratulations goes out to our 2025 Awards Winners, featured in this newsletter. The commitment shown in every submission, the drive to enhance our field, and the attention to detail highlighting real progress are truly inspiring.

2025 Award Winners

Lawn over 10,000 Square Feet – Memorial Park and Conservancy

McKinney Christian Academy***

Baseball Field of the Year – Dell Diamond

Job Well Done!

It was wonderful to see such positive results from this past winter show and education program. My hope is that we continue to spark enthusiasm

Texas Turfgrass Association
has implemented a Texting System and we urge you all to opt in.

Please Text: TTA2023 To: 972-243-9239

This service will only be used for TTA events and notifications.

This is a great tool! Emails get buried and you can stay informed!

for these two days of learning, networking, and invaluable experience every December. While there are many other shows and conferences where you can earn CEUs, TTA aims to keep you coming back for the quality time, experiences, and outstanding education we offer.

If you know someone interested in joining or who might benefit from membership, please encourage them to join our association. We're committed to bringing together professionals from Sod, Sports, Golf, Lawn and Landscape, and Affiliates.

Thank you to all Members, Exhibitors, Sponsors, and our incredible Board of Directors for your dedication and communication throughout the year. I'm looking forward to an excellent 2026.

God bless and Happy New Year!

Katie Flowers
Executive Director

Texas Turfgrass Innovations to Watch in 2026

By: Samantha Wilson

Maximizing turf performance while minimizing water use is increasingly critical for Texas turf managers. From next-generation cultivars to smart monitoring systems, 2026 promises several innovations that can improve efficiency, resilience, and sustainability.

1. Next-Generation Drought-Tolerant Bermudagrass

Recent research highlights genetic variability in advanced bermudagrass hybrids, with lines like OSU 2082 and TifB16117 showing superior drought tolerance compared to older standards (e.g., Tifway) and rivaling TifTuf in water-use efficiency.

Key Benefits:

- Reduced irrigation needs (up to 20–30% seasonal savings)

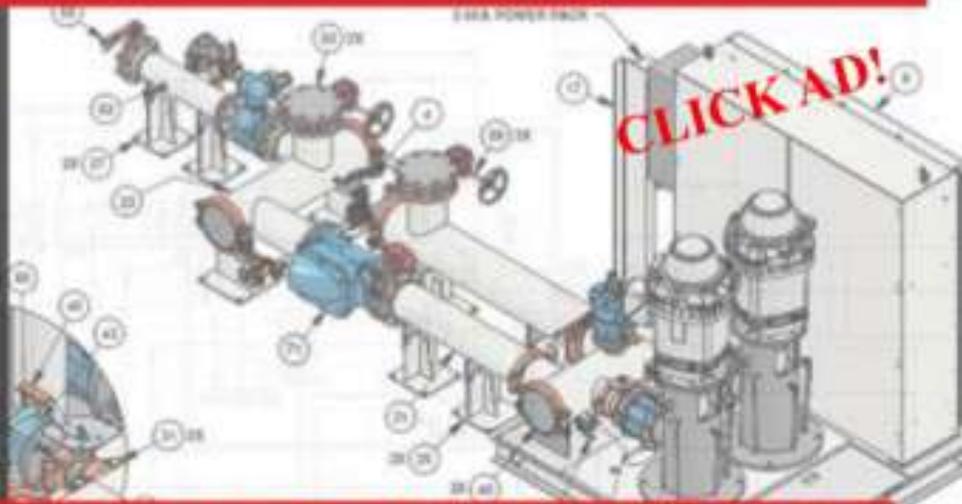

- Maintains color, density, and wear tolerance under stress

- Suitable for commercial, recreational, and residential landscapes

2. Water-Efficient Cultivars from Texas A&M University

The Texas A&M Turfgrass Breeding Program continues to produce warm-season cultivars with enhanced drought, disease, and insect resistance. These grasses are ideal for environments where water restrictions and high temperatures challenge turf management.

Impact:

Less irrigation, fertilizer, and pesticide input

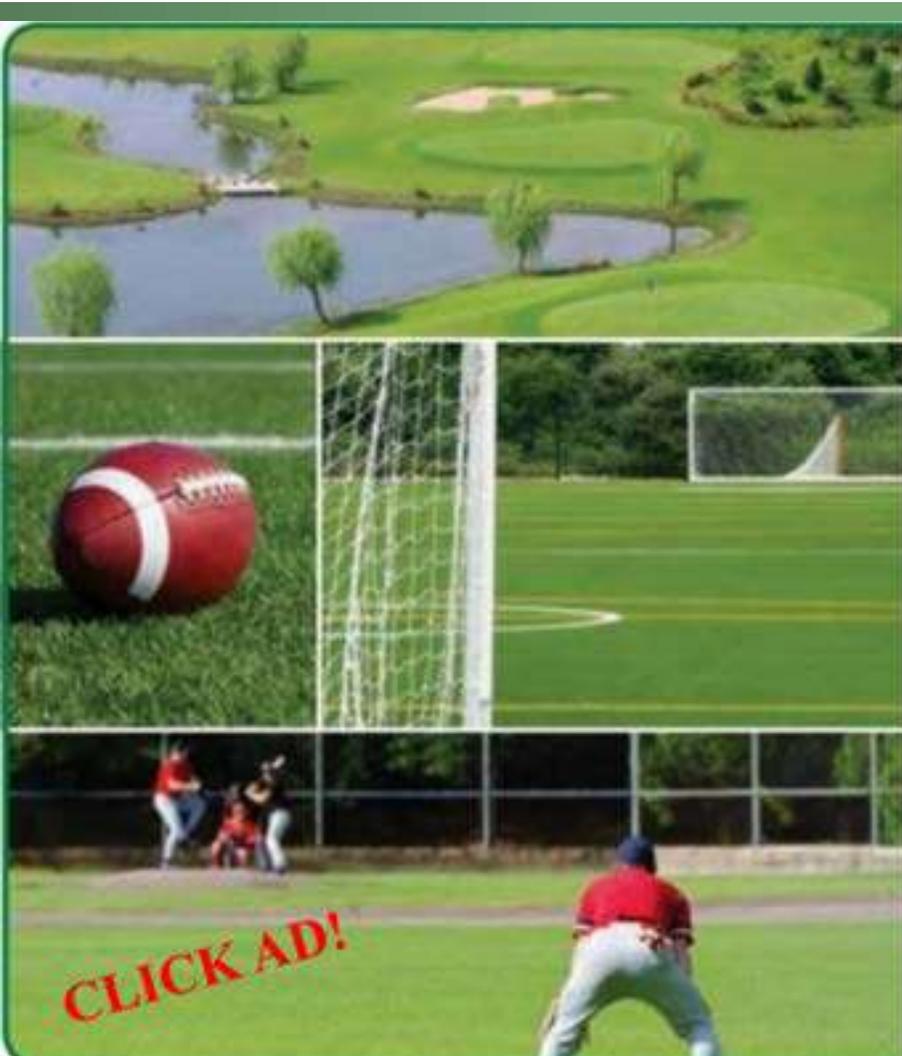

Improved turf resilience in extreme weather

Enhanced performance for sports fields, residential lawns, and commercial properties

3. Low-Maintenance Zoysiagrass

Lobo™ Zoysiagrass (NC State University) establishes quickly, tolerates drought, and thrives with minimal fertilization and mowing. It is an attractive option for areas with labor constraints or strict water regulations.

Making Texas
**A HEALTHIER SHADE
OF GREEN!**

All Seasons Turf Grass has more than 30 years of experience delivering the very best turfgrass for projects across Texas. We use state-of-the-art technologies to keep costs down while growing healthy, lush grass. And because we cut to order, when you see All Seasons Turf Grass being installed, you can be assured that it was still growing on the farm just hours ago.

Call us today or visit our main office just west of Houston to see what a difference our grass can make.

**ALL SEASONS
TURF GRASS**

32601 F.M. 529 • Brookshire, TX 77423
Phone 281.375.7505 • AllSeasonsTurf.com

Takeaways:

- Dense, wear-tolerant turf suitable for recreation
- Lower maintenance requirements
- Reduced irrigation and chemical inputs

4. Sensor-Based Irrigation: Data-Driven Water Management

Studies from the University of Florida show that soil moisture sensors can significantly reduce water use while maintaining turf quality compared to fixed irrigation schedules. Adoption of sensor-driven irrigation is becoming more cost-effective as technology prices decline.

Advantages:

- Optimized irrigation scheduling based on real-time soil moisture
- Reduced nutrient leaching
- Enhanced root-zone health and overall turf performance

5. New Cultivars from Other Regions

The UC Riverside cultivar Coachella™ bermudagrass is drought-tolerant and may reduce water use by up to 65% compared to traditional bermudagrass varieties. It could become commercially available in Texas in 2026.

Implications:

- Expands drought-resistant grass options for Texas turf managers
- Provides alternative low-water solutions for urban and sports applications

6. Advanced Soil and Root-Zone Monitoring

Emerging in-ground CO₂ sensors and subsurface monitoring tools track root respiration, microbial activity, and stress physiology, enabling proactive turf management.

Benefits:

- Early stress detection before visual symptoms appear
- Improved irrigation, fertilization, and aeration decisions
- Better long-term turf health and performance

7. Smart Agriculture and Phytobiome Management

The integration of IoT, machine learning, and phytobiome engineering is gaining traction in turf systems. By manipulating plant and microbial communities, managers can improve water efficiency, disease resistance, and growth regulation.

Summer
Conference
Save
the Date!**

THE
WOODLANDS[®]
RESORT

July 12 – 14
2026

The Woodlands
Resort
Curio Collection
Hilton

Potential Advantages:

- Reduced chemical inputs
- Enhanced turf quality and resilience
- Data-driven optimization of cultural practices

Why This Matters for Texas Turf Managers

- **Water Savings:** Drought-tolerant cultivars and sensor-based irrigation reduce reliance on municipal water.
- **Lower Input Costs:** Resistant cultivars decrease fungicide, insecticide, and fertilizer requirements.
- **Increased Resilience:** Turf withstands extreme heat, drought, and traffic stress.
- **Better Decisions:** Smart agriculture tools allow managers to make informed, precise choices.

2026 will be a pivotal year for Texas turf management and managers who adopt these innovations early can improve efficiency, reduce environmental impact, and maintain high-quality turf under increasingly challenging conditions.

Texas Turfgrass Association 2025 Award Winners

The Texas Turfgrass Association (TTA) proudly recognized three outstanding award recipients during the 2025 Annual Winter Conference and Trade Show. These honorees represent the best in sports field and landscape management across Texas, demonstrating innovation, dedication, and a commitment to providing safe, high-quality turf under challenging conditions. From professional baseball to high school football and iconic urban parkland, each winner exemplifies excellence in the turfgrass industry.

2005
***Baseball Field of
the Year***

Dell Diamond

Assistant Groundskeeper: Owen McGeeney

2005 Football Field of the Year

**McKinney Christian
Academy**

McMahan Turf and Agronomics LLC

A Shared Commitment to Excellence

Together, these three award winners showcase the diversity, skill, and passion within the Texas turfgrass community.

Whether maintaining a professional baseball stadium, a growing high school football program, or a nationally recognized urban park, each team demonstrates what can be achieved through dedication, innovation, and pride in the profession. The Texas Turfgrass Association congratulates all 2025 award recipients on their well-earned recognition.

2005 Landscape Maintenance Field of the Year

**Memorial Park
Conservancy**

Operations Manager of Grounds: Marc Orduna

2025 Baseball Field of the Year:

Dell Diamond

Assistant Groundskeeper: Owen McGeeney

Dell Diamond, home of the Round Rock Express, earned the 2025 Baseball Field of the Year Award for its consistently elite playing surface and professional-level maintenance standards. Originally built in 2000, the field underwent a modern renovation, and the current playing surface is just two years, designed with sustainability, performance, and durability in mind.

Located in Central Texas, Dell Diamond faces extreme summer heat and sporadic heavy rainfall, demanding precise irrigation and turf management. Despite these challenges, a small but highly skilled grounds crew of just three full-time staff members maintains the 180,000-square-foot baseball field to a standard that rivals Major League facilities.

Maintenance practices include walk-behind mowers for the infield, triplex mowers for the outfield, and a consistent mowing height of 5/8 inch. Infield and foul areas are hand-watered daily during the season, while the outfield relies on a programmable automatic irrigation system adjusted for weather and turf response. With an annual groundskeeping budget of \$70,000, the team balances routine care with unexpected repairs, erosion control, irrigation maintenance, and daily game preparation.

Dell Diamond hosts more than 70 professional games annually, along with UIL State Baseball Championships, college matchups, softball events, commercial shoots, and community showcases. The field's ability to perform under constant use highlights the crew's dedication, craftsmanship, and pride in their work, making Dell Diamond a standout and deserving recipient of the Baseball Field of the Year honor.

TURFGRASS SHORT COURSE

February 16-19th 2026

College Station, TX

The course is a four-day course designed for turf professionals and enthusiasts looking to expand their knowledge of turfgrass systems and best management practices.

[Visit the website!](#)

2025 Football Field of the Year:

McKinney Christian Academy

McMahan Turf and Agronomics LLC

McKinney Christian Academy's football field was recognized as the 2025 Football Field of the Year, honoring nearly a decade of steady improvement and commitment to turf excellence. Located in McKinney, Texas, the approximately 25-year-old Bermuda turf field has been carefully maintained and enhanced through a long-term partnership with McMahan Turf and Agronomics, LLC.

The maintenance program includes periodic fertilization and weed control applications throughout the growing season, winter rye overseeding for year-round activity, and bi-annual aeration. Irrigation is supplied through a well-water system and used as conditions require. While operating costs fluctuate, the field benefits from a combination of subcontracted mowing and turf services, supported by three to four full-time staff members.

One of the most significant milestones came this year when McKinney Christian Academy hosted its first ever Friday night home football game at its campus field, made possible through years of turf improvements and the use of temporary lighting systems. The historic event drew a large crowd and marked a proud moment for the school, its students, and the maintenance team. This award recognizes not just field quality, but the dedication and vision that transformed the field into a true home venue.

2025 Landscape Maintenance Field of the Year:

Memorial Park Conservancy

Operations Manager of Grounds: Marc Orduna

Memorial Park Conservancy received the 2025 Landscape Maintenance Field of the Year Award for its exceptional management of Zorro Zoysia turf across one of Houston's most prominent public spaces. Now five years old, the turf areas are maintained using a progressive, data-driven approach that blends technology, sustainability, and hands-on expertise.

The seven-member turf and grounds team utilizes Toro SprayMaster equipment for precise fertilizer and pesticide applications, paired with a Harrell's organic and hybrid fertility program tailored to Zoysia's seasonal growth cycles. Soil moisture is monitored using FieldScout TDR meters, allowing irrigation decisions to be based on real-time data rather than preset schedules. Automated WeatherTRAK irrigation systems further enhance water efficiency.

Routine practices, including aeration, dethatching, mowing height regulation, and targeted fungicide rotations, support turf density, resilience, and visual appeal. With an operating budget of \$30,000 and more than 20 to 30 events hosted annually, Memorial Park's turf consistently performs at a professional level while reflecting a strong commitment to environmental stewardship.
